

Killearn- Site Options

Local Development Plan 3 - Site Options Consultation

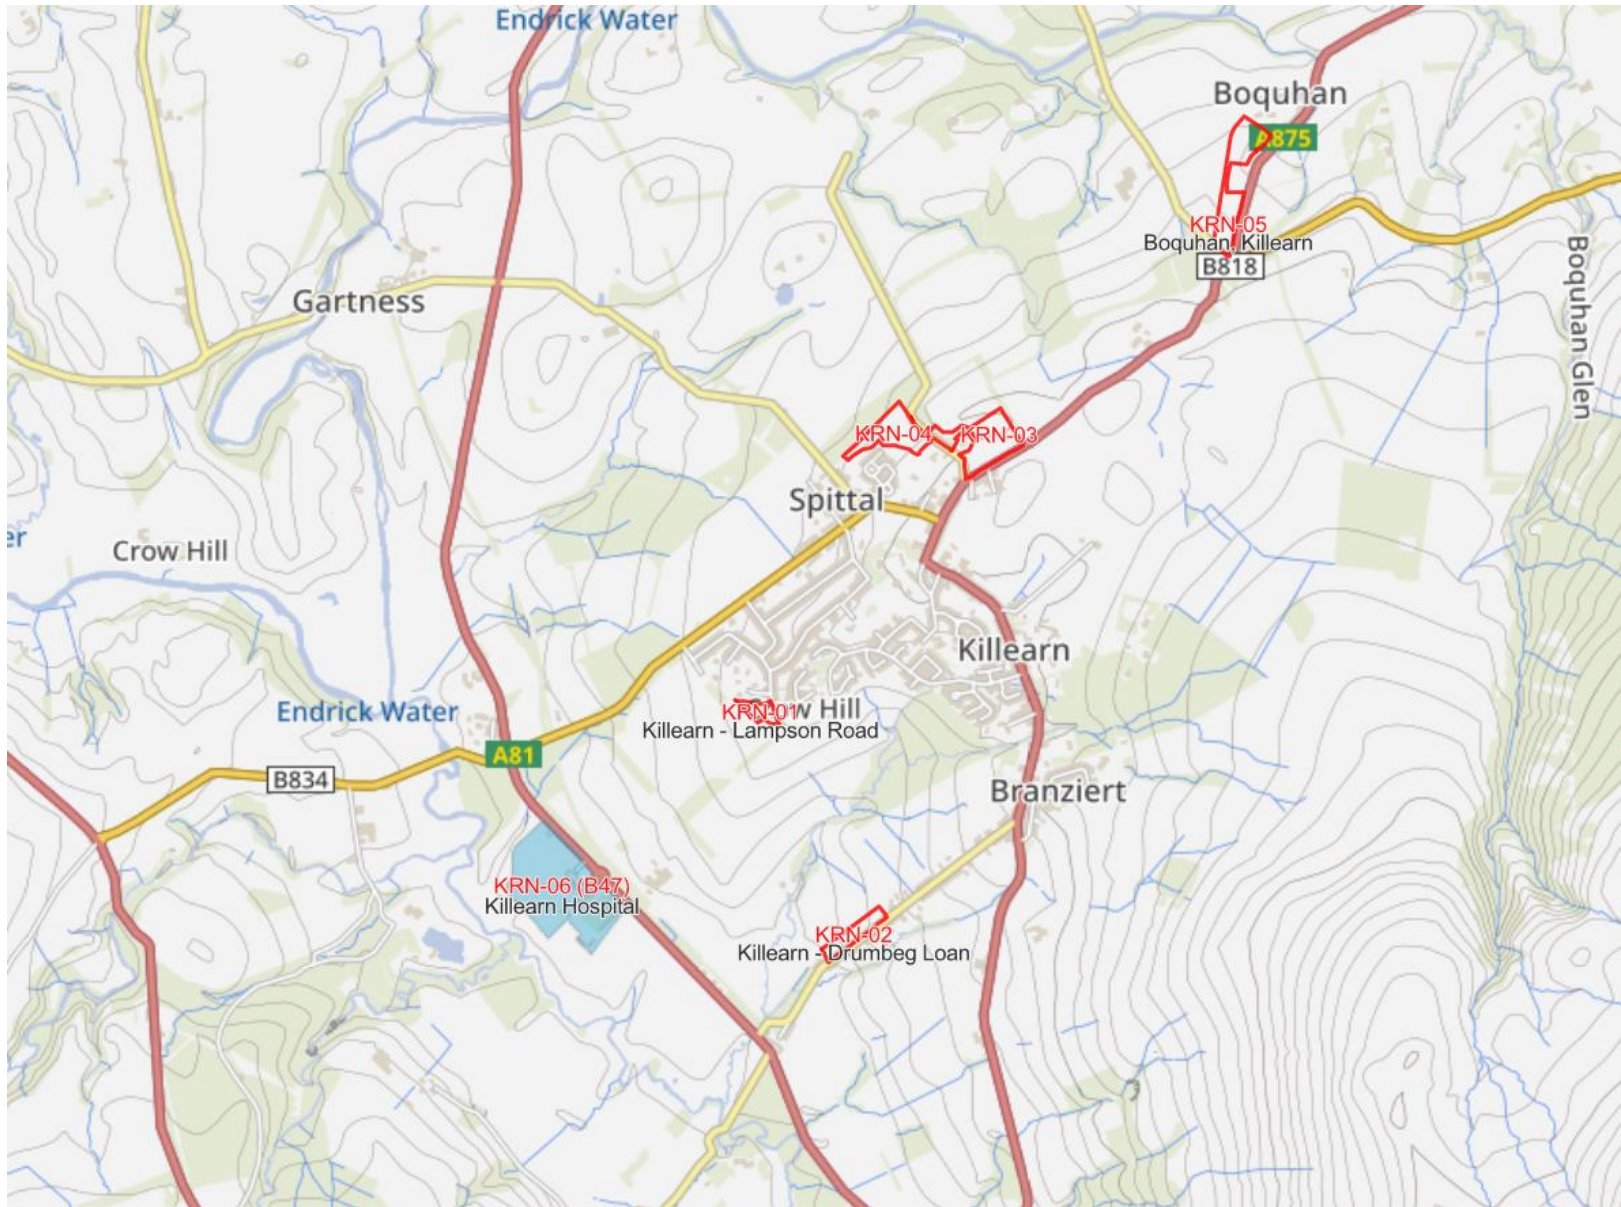

1. Summary of Site Options

Site options currently being considered for inclusion in the proposed plan

An overview of the sites being considered for inclusion in [Stirling' next Local Development Plan](#) (LDP3), as the relate to Killearn Community Council area, is provided in the table and map below.

Site Reference(s)	Source	Site Location	Promoted Use(s)	Summary of Promoted Use
KRN-01	Call for Sites Submission	Killearn - Lampson Road	Residential	Greenfield site promoted for residential use. At this stage, the site is being considered for a capacity of 6 new homes.
KRN-02	Call for Site Submissions	Killearn - Drumbeg Loan	Residential	Greenfield site promoted for residential use. At this stage, the site is being considered for a capacity of 6-10 homes.
KRN-03	Call for Sites Submission	Drumtian, Balfon Road, Killearn	Residential	Greenfield site promoted for residential use. At this stage, the site is being considered for a capacity of 32 homes.

Site Reference(s)	Source	Site Location	Promoted Use(s)	Summary of Promoted Use
KRN-04	Call for Sites Submission	Drumtian Road, Killearn	Residential	Greenfield site promoted for residential use. At this stage, the site is being considered for a capacity of 5 new homes.
KRN-05	Call for Sites Submission	Boquhan, Killearn	Residential	Greenfield site promoted for residential use. At this stage, the site is being considered for a capacity of 10 homes.

2. Killearn Local Place Plan

Summary of Local Place Plan provisions relevant to the assessment of site options

The [Killearn Local Place Plan](#) includes the following general provisions relevant to the site options presented here for the Killearn Community Council area (note: this is not an exhaustive list):

General Proposals / Requirements

- It is important that the unique character and specific needs of the village setting. Is respected. maintaining a strong sense of local identity and belonging.
- Support local amenities such as retail outlets, the school, and other services.
- Boundary treatments are an important element of Killearn’s historic character. Preserving and continuing these features contributes significantly to the visual coherence.
- There is a strong desire to maintain clearly defined settlement boundaries and to resist pressure for infill development— particularly in the green space between the village and the hospital site.
- The protection of green spaces is considered a critical aspect of the planning process.
- The Community is firmly opposed to any development on key green spaces that have been identified and valued by residents.
- The loss of ancient woodland, ancient and veteran trees is not supported.
- Series of public transport improvements.
- Development should be energy efficient and low carbon in design and construction.
- Support for the use of green infrastructure where possible.
- Resistance for new housing development.

Site-specific Proposals / Requirements

- Community spaces such as the village hall and the kirk are well used but costly to maintain. Assistance in improving energy efficiency for such public buildings is needed.

3. Individual Site Options

Site options & key considerations for the initial stage of the site assessment process

In this section, you will find two summary tables, along with the related maps, covering the sites currently being considered for inclusion in the Proposed Plan.

As the maps included here are illustrative, the information should be read alongside the StoryMap - [Killearn - Site Options](#), where the site options and relevant data layers can be explored in more detail.

In addition, a Stirling-wide map showing all site options currently under consideration can be viewed here - [LDP3 Proposed Plan Site Options Map](#).

The tables provided below give an overview of whether the key considerations apply to each site and are presented as follows:

- **Table 1 and associated Maps 1-4 – Environment, Landscape and Nature Considerations:**
Show the site options plotted against the relevant data sources for this theme, including flood risk, green belt areas, national and local landscape and biodiversity designations, and the presence of trees and woodland.
- **Table 2 and associated Map 1 – Historic Environment and Cultural Heritage:**
Show the site options plotted against the relevant data sources for this theme, including listed buildings, conservation areas, scheduled monuments, battlefields, and designed landscapes.

The considerations presented are derived from Stage 1 of the Site Appraisal Methodology, which was approved as part of the Evidence Report process. They therefore play an important role assessing sites for inclusion in the Proposed Plan and, where this is the case, what mitigation might be required to address any site-specific issues.

When the tables, based on the mapped information, below indicate that a consideration applies to a site (shown as 'yes'), this should not be interpreted as meaning the site will be rejected. In most cases, it simply highlights where further detailed assessment may be required at later stages of the site assessment process, potentially involving additional information or specialist input from relevant services or agencies.

Similarly, where a table indicates that no considerations apply to a site (shown as 'no'), this should not be taken to mean that the site will automatically be supported for inclusion in the Proposed Plan.

As the site assessment process is still at an early stage, no conclusions can yet be drawn about which sites will be selected for inclusion in the Proposed Plan. This is because several important matters have not yet been assessed and therefore do not appear in the considerations presented below.

These outstanding matters include assessments of infrastructure capacity, such as the individual and cumulative impacts of development on:

- the road network
- school rolls
- GP practices and other health services

They also include accessibility and connectivity considerations, meaning factors such as:

- how well a site is served by active travel routes
- whether local services and facilities can be accessed safely and conveniently on walking or wheeling, by bicycle, or by public transport

These matters will be considered in the later stages of the site assessment process, alongside the comments received through this consultation once the consultation period has closed.

Key Considerations - Environment, Landscape and Nature

Table 1. below confirming (Yes/No) whether the key considerations relating to the environment, landscape, and nature apply to the site options within the Killearn Community Council area.

Site Option References	Key Considerations					
	Environment, Landscape and Nature Considerations					
	a. Flood risk: Is the site within or close to an area at risk of flooding?	b. Green Belt: Is the site within a designated green belt?	c. Nationally Designated Sites: Is the site within, or adjacent to, a designated area protected for habitats or species?	d. Locally Designated Sites: Is the site within, or adjacent to, an area designated for its landscape, biodiversity, or geodiversity value?	e. Green Network: Does the site form part of a green corridor or is it used for formal play, sport, or recreation?	f. Trees & woodland: Are there trees or woodland areas within or close to the site?
KRN-01	No	No	No	No	No	Yes
KRN-02	Yes	No	No	No	No	No
KRN-03	Yes	No	No	Yes	No	Yes
KRN-04	Yes	No	No	No	No	Yes
KRN-05	Yes	No	No	Yes	No	No
KRN-06	Yes	No	No	No	No	Yes

Maps 1-4 below show the site options plotted against the relevant data sources for each consideration identified in the table above.

Map 1 - Environmental, Landscape, Nature Considerations

Site options in relation to flood risk areas

Legend

1(a). SEPA Medium Flood Risk Management (river, surface, coastal, future layers)

River Flooding High Likelihood

Each year this area has a 10% chance of flooding.

River Flooding Medium Likelihood

Each year this area has a 0.5% chance of flooding.

River Flooding Low Likelihood

Each year this area has a 0.1% chance of flooding.

Surface Water and Small Watercourses Flooding High Likelihood

Each year this area has a 10% chance of flooding.

Surface Water and Small Watercourses Flooding Medium Likelihood

Each year this area has a 0.5% chance of flooding.

Surface Water and Small Watercourses Flooding Low Likelihood

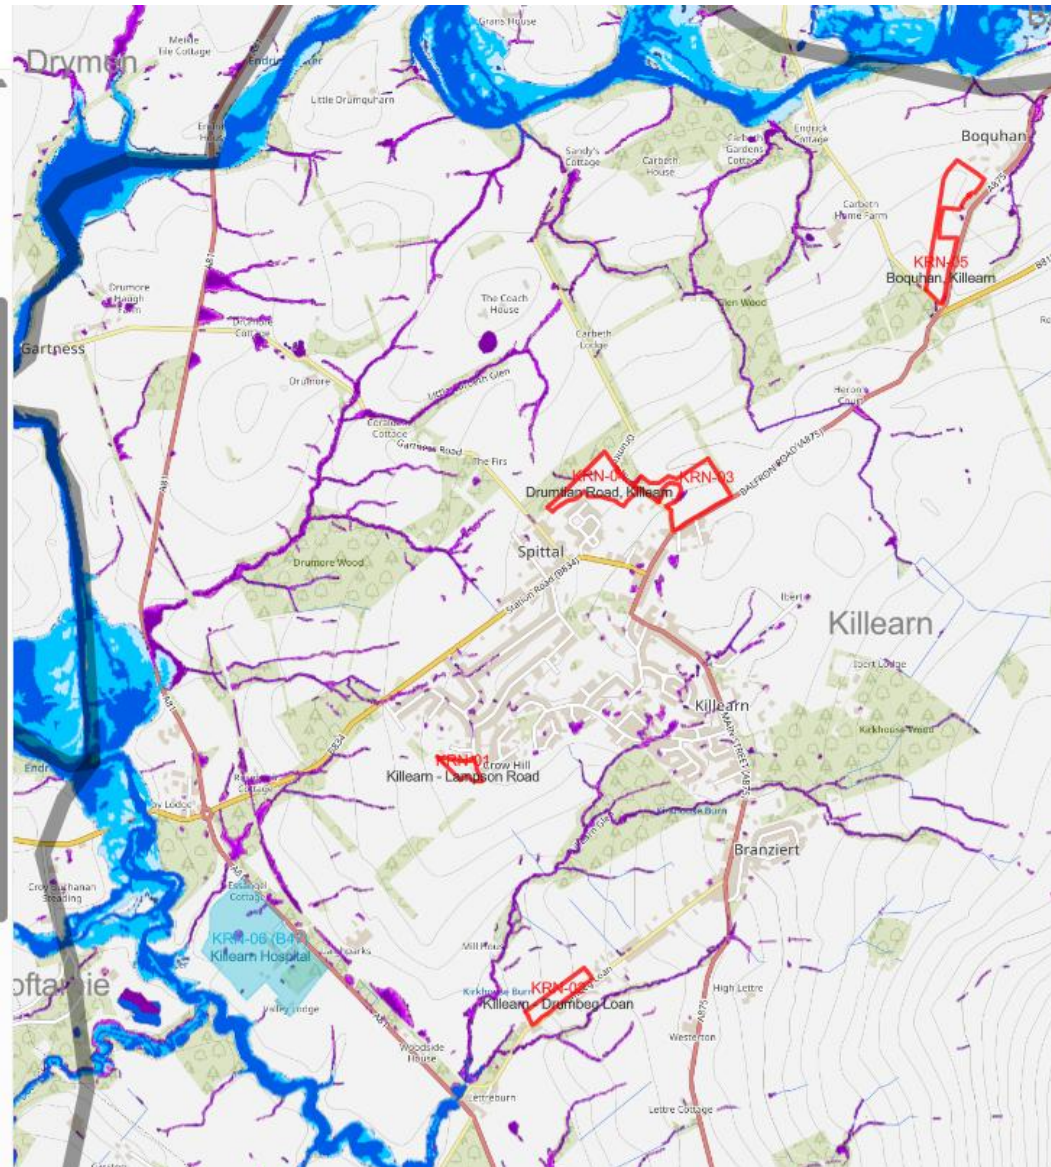

Each year this area has a 0.1% chance of flooding.

Coastal Flooding High Likelihood

Each year this area has a 10% chance of flooding.

Coastal Flooding Medium Likelihood

Each year this area has a 0.5% chance of flooding.

Map 2 - Environmental, Landscape, Nature Considerations

Site Options in relation to National and Local Designations (landscape, biodiversity and geodiversity)
